What is this product?

Type

The Sub-fund is part of INCOMETRIC FUND, organized under the laws of the Grand Duchy of Luxembourg as a mutual investment fund. This Fund is authorised and supervised in Luxembourg by the CSSF. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Investment Objective of the Sub-Fund is to achieve mid-term capital appreciation. The Sub-Fund seeks to accomplish this objective through investing primarily in equity and fixed income mainly issued in OECD countries, but also on ancillary basis in emerging markets. These investments are made directly through fixed income and equity securities and also indirectly through UCIs/UCITS including ETFs.

The Sub-Fund is managed following a geographical as well as sectorial diversification, based on a dynamic investing methodology combined with the objective of preserving capital.

The Sub-Fund is invested in equities and in bonds (including but not limited to convertible bonds, high yield bonds with a maximum exposure of 10% of the Sub-Fund total net assets, fixed-rate or floating securities, zero-coupon bonds and treasury bonds), UCIs/UCITS including ETFs, money market instruments issued or dealt on the Eurozone and other international regulated markets and deposits. In any case, the total allocation to other UCIs should not exceed 30% of the Sub-Fund total net assets.

For hedging and on ancillary basis for investment purposes, the Sub-Fund may use financial derivative instruments products traded on a regulated market and/or over the counter (OTC), provided they are contracted with first class financial institutions specialized in this type of transactions. In particular, the Sub-Fund may take exposure through financial derivative instruments and forwards on any eligible underlying, such as currencies, interest rates, transferable securities or financial indices, at all times in compliance with the Grand Ducal Regulation.

Intended retail investor

Reserved for retail and institutional investors denominated in USD. The aforementioned investment strategy corresponds for the investors with a medium investment risk profile. This Sub-Fund may not be appropriate for investors who plan to withdraw their money within a three year period. Minimum Initial Investment: USD 5,000.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance-Scenarios:

Recommended holding period: 3 years Example Investment: 10,000 USD		If you exit after 1 year	If you exit after 3 years
Stress scenario	What you might get back after costs	7,560 USD	7,670 USD
	Average return each year	-24.4 %	-8.5 %
Unfavourable scenario	What you might get back after costs	8,700 USD	9,180 USD
	Average return each year	-13.0 %	-2.9 %

Favourable scenario	What you might get back after costs	11,540 USD	11,970 USD
	Average return each year	15.4 %	6.2 %
Worst case scenario	You could lose some or all of your investment		

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between September 2021 and September 2022 (If you exit after 1 year), December 2019 and December 2022 (If you exit after 3 years).

Moderate scenario: This type of scenario occurred for an investment between August 2024 and August 2025 (If you exit after 1 year), February 2022 and February 2025 (If you exit after 3 years).

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2021 (If you exit after 1 year), December 2018 and December 2021 (If you exit after 3 years).

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 USD

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	466 USD	1,483 USD
Annual cost impact (*)	4.7 %	4.7 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.4 % before costs and 0.7 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.
