What is this product?

Type

The Sub-fund is part of BICE Inversiones fund. This document relates to BICE Inversiones, a Luxembourg investment company with variable capital established in the form of a public limited liability company. The Depositary is UBS Europe SE.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Sub-Fund will be able to invest up to 100% of its net assets in High Yield products and/or transferable securities of Latin American or Caribbean countries. The High-Yield products, also called sub-investment grade, which are rated below investment grade, are bond issues offering high yields. This relates to bonds issued by companies being turned around or with low credit ratings, i.e. a high level of debt. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

The Sub-Fund can invest up to 15% of the net assets in bonds with a rating below B- (S&P or Fitch) or B3 (Moody's). In case a rating is not available for a security, the issuer's rating will be considered instead for the application of the above rules. Products/issuers for which a rating is not available will not exceed 15% of the Sub-Fund net assets.

The Sub-Fund is authorised to invest up to 20% of its net assets, in Contingent Convertible Securities (CoCos).

The Sub-Fund will not invest in equities.

The Sub-Fund may hold ancillary liquid assets limited to bank deposits and cash on sight, such as cash, with a maximum of 20% of the net assets of the Sub-Fund in order to cover current or exceptional payments.

Intended retail investor

Reserved for retail and institutional investors. The Sub-Fund is designed for investors who are able to assess the risks and the value of the investment. The aforementioned Investment policy corresponds to investors with a medium tolerance and medium investment risk profile. Minimum Initial Investment: 5,000 USD.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance-Scenarios:

Recommended holding period: 3 years Example Investment: 10,000 USD		If you exit after 1 year	If you exit after 3 years
Stress scenario	What you might get back after costs	8,440 USD	8,610 USD
	Average return each year	-15.6 %	-4.9 %
Unfavourable scenario	What you might get back after costs	8,440 USD	9,310 USD
	Average return each year	-15.6 %	-2.4 %

Favourable scenario	What you might get back after costs	12,330 USD	13,300 USD
	Average return each year	23.3 %	10.0 %
Worst case scenario	You could lose some or all of your investment		

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between October 2021 and October 2022 (If you exit after 1 year), October 2019 and October 2022 (If you exit after 3 years).

Moderate scenario: This type of scenario occurred for an investment between March 2017 and March 2018 (If you exit after 1 year), March 2020 and March 2023 (If you exit after 3 years).

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2021 (If you exit after 1 year), October 2022 and October 2025 (If you exit after 3 years).

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 USD

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	363 USD	558 USD
Annual cost impact (*)	3.7 %	1.8 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.6 % before costs and 2.9 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.

One-off costs upon entry or exit		
Entry costs	3.0 % of the amount you pay in when entering this investment. This is the maximum amount you could pay and it could be less.	300 USD
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	0.7 % of the value of your investment per year.	70 USD
Transaction costs	0.0 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	1 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 USD

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This fund has no minimum holding period, but has been created for medium term investment. You should therefore be prepared to remain invested with your investment for at least 3 years. However, you can return your investment on any bank business day in Luxembourg.
